Georgia Tech is pleased to launch the Rising Stars in Computer Architecture (RISC-A) initiative. RISC-A is a workshop for final-year PhD students and post-docs working broadly in the area of computer systems architecture, interested in a career in academia.

In this inaugural first edition, we will invite a group of selected candidates to fly in to Atlanta for a day long workshop where they will get an opportunity to present their research and get informal feedback from Georgia Tech faculty and peers. The workshop will also include a session detailing the academic job application process, and end with a dinner for all speakers with Georgia Tech faculty and PhD students. **Funds for travel and accommodation will be provided for the selected candidates.**

**Date of Workshop:** Friday, October 5, 2018

**Location:** Georgia Institute of Technology, Atlanta, GA

**Eligibility:**
Applicants must be final year PhD students or post-docs, graduating in 2019, and planning to apply for an academic position by end of 2018 / early 2019.

**How to Apply:**
Applicants should email a copy of their CV accompanied by a 1-page research statement to risca.gt.2018@gmail.com
The applicants also need to ask their PhD/post-doc advisor to send a short letter of recommendation separately to risca.gt.2018@gmail.com

**Submission Deadline:** August 31st 2018.
